My Fruit Loaf - 23rd/Dec/2025

Bake @150°C / Gas Mark 1... For 1Hr+25mins

This baked *Perfectly!*, Finally!

- Didn't require being covered by foil to protect it at all

- The decreased Temp. & increased duration was the fix.

Loaf Internal Temp... +95°C

DESCRIPTION

Created: June/2022

Updated: Dec/2025

I created the Muffin Fruit Loaf bcoz I love fruit Muffins but I wanted it in a loaf & still use the muffin mix.

Julie suggested putting Salted Caramel Choco in it too & it worked!

DIRECTIONS

Note: Mixing The... Eggs, Butter & Single Cream

- Add the Melted Butter to the Whipped Eggs

- Then add the Single Cream to the Egg/Butter Mix

Do NOT... *Add the Butter & Single Cream together!*

Bcoz... The melted butter can be cooled by the chilled cream, then the butter/single cream mix will become lumpy & sepearate.

Then the only way to re-melt the butter is to heat it up again. But if you heat up the Single Cream it can split & completely spoil the intended way the mix should be for THIS recipe.

REMEMBER!! --> Butter & Eggs >> Then Cream

Then you'll have a beautiful silky emulsion of those three.

Pre-heat the oven to 160°C / Gas Mark 2... (My Oven, 2025)

Bake in the Pre-Heated oven For 1Hr+25mins

@150°C / Gas Mark 1 - (My Oven, 2025)
